Please help Windows 8 problem with the installation of CCleaner When I first ran the CCleaner it said it needed "old" version of msconfig in order to create the shortcuts needed and failed to install. Then I tried again to run CCleaner and it failed to run. I went to Microsoft and "reset" the default page but it did not resolve the problem. When I tried to run the.exe file from disk it would fail and say something like: "The folder contents could not be displayed. Access is denied." Any ideas on how to fix this problem.
